

INTERFACE GATEWAY**SL-1911 Console Interface Module****NEW PART**

SL-1911-9

The next generation of diagnostic gateway has been upgraded to be smaller, lighter and more powerful. Originally designed to be a PC Diagnostic tool for the SmartLink cabin system. The next generation gateway expands the capabilities to interface to diverse set of third-party communication devices. The upgraded processor enables the module to be perform custom scripting and automation. Custom scripting feature also enables the SmartLink system to control third party devices. The next generation gateway enables third party devices can interface to an existing SmartLink system.
